Defend the beach. Don't let the enemy get near the stuff on the beach.
<Something behind you? Watchout for Tigers and everything else.>

First things first..... the game is not bad at all for being 7 years old at the writing of this review. It is a fun tank sim with simple controls and a simple HUD. You as the player are not overpowered and it does require some thinking when you are actually engaging targets.

Now as for the technical stuff... once you have downloaded the game go to your steam folder then to steam apps then common , find this game and then right click on BOTH the applications and run compatibility checks on them.

It will run with no problem after you do this, but you have to run the compatibility checks on BOTH... or else you wont be able to shoot.(:P)

Last thing.. now you run the game (if you dont do the compatibility FIRST windows 8 will get caught in a loop :D)

Enjoy.. This is just bad.... everything is horrible.
